 - 03** | Sports facilities management application

01 School request logging application

School request logging application offers a comprehensive solution for organizing and managing requests to schools and is designed to facilitate communication between the school administration and the municipality.

- ✓ Submit requests quickly and easily
- ✓ Categorization of requests
- ✓ Track requests progress
- ✓ Update on the final processing of the request by receiving notifications
- ✓ Request history for future reference
- ✓ Available on mobile devices

02 Volunteer register and volunteer management application

- ✓ Raising awareness and strengthening the social conscience of citizens
- ✓ Facilitate the effective planning of voluntary actions
- ✓ Encouraging social inclusion and cohesion, creating solidarity relations
- ✓ Centralized management of all volunteer information and actions
- ✓ Valuable data for improving and developing voluntary actions
- ✓ Direct communication with volunteers and coordination of actions

Volunteer register and volunteer management application is a powerful tool that enhances efficiency in voluntary organizations.

By using this platform, organizations can improve the management of volunteers, better organize their actions and achieve their objectives.

- Includes all the information concerning the volunteers (contact details, interests, knowledge)
- Accessible from a PC, smartphone or tablet
- Those interested can easily and quickly sign up to the volunteer register, view current activities and register their participation
- Volunteers receive information via push notification and e-mail for the upcoming voluntary actions of the Municipality

03 Sports facilities management application

The sports facilities management application is a software designed to ease the organization and operation of sports facilities, such as stadiums, swimming pools, gyms, indoor sports centers and other related premises. This application provides tools and functions that simplify day-to-day management, enabling efficient use of the facilities and providing better services to users.

- ✓ Management of sports and cultural infrastructure
- ✓ Management of sports and cultural events
- ✓ Management of internal users and citizens
- ✓ Management of registrations, subscriptions and their detailed monitoring
- ✓ Public access to all activities
- ✓ Setting price lists per event or infrastructure with the possibility of creating price lists for specific categories
- ✓ User service via mobile app, Web app

The application has the following subsystems for the efficient management of employees and faster service to citizens:

- Applications
- Registry
- Planning
- Reports
- Notifications
